

# ABSTRACT

**URBOX** is technology that allows you to save files in storage, and then access those files via the Cloud. Let's understand it in a simpler way. First, **storage** is the computer's ability to save files and other resources for later use. When you restart a computer, the files that are still available after the computer turns back on are saved and read from storage. Such storage commonly consists of a hard drive, a USB Flash drive, or another type of drive. Because local data drives can be damaged or stolen, an idea was developed to use data drives over a network as storage. This allows the drives to be secured in a data centre and backed up automatically. we don't need a hard disk in our computers if we can get to the server faster, carrying around these non-connected computers is byzantine by comparison.

The project allows the users to upload, download, and delete files

- Users must be able to upload new files
- Users must be able to access the contents of the files that they have uploaded
- Users must be able to delete files that they have uploaded

# ACKNOWLEDGEMENT

Any achievement does not depend solely on the individual efforts but on the guidance, encouragement and co-operation of intellectuals, elders and friends. A number of personalities, in their own capacities have helped us in carrying out this mini project work. We would like to take this opportunity to thank them all.

We would like to express my profound thanks to **Sri. G Dayanand**, Chairman, Sapthagiri College of Engineering Bangalore, for his continuous support in providing amenities to carry out this Mini Project.

Also, we would like to express our immense gratitude to **Dr. Aswatha Kumar M**, Principal, Sapthagiri College of Engineering Bangalore, for his help and inspiration during the tenure of the course.

We also extend our sincere thanks to **Dr. H R Ranganatha**, Professor and Head, Department of Information Science and Engineering, Sapthagiri College of Engineering, for his constant support.

We would like to express our heartfelt gratitude to **Mr. Vijay Kumar FG**, Assistant professor, Department of Information Science and Engineering, Sapthagiri College of Engineering, for their timely advice on the mini project and regular assistance throughout the work.

We also extend our sincere thanks to all the **Faculty members** and **supporting staff** Department of Information Science and Engineering, Sapthagiri College of Engineering, for their constant support and encouragement.

Finally, we thank our parents and friends for their moral support.

**SHUBHAM SARVESH**

**PRIYESH SHRIVASTAVA**

# TABLE OF CONTENTS

<b>Chapter No</b>	<b>Chapter Name</b>	<b>Page No</b>
<b>1.</b>	<b>Introduction</b>	<b>1</b>
<b>2.</b>	<b>System Analysis</b>	<b>2</b>
2.1.	Literature Survey	2
2.2.	Proposed System	3
2.2.1.	Scope of the Project	3
2.2.2.	Aim of the Project	3
<b>3.</b>	<b>Requirement Specification</b>	<b>5</b>
3.1.	System Requirement	5
3.1.1.	Hardware Requirement	5
3.1.2.	Software Requirement	5
3.2	Development Environment	5
<b>4.</b>	<b>System Design</b>	<b>9</b>
4.1.	ER Diagram	9
4.2.	Schema Diagram	10
<b>5.</b>	<b>System Implementations</b>	<b>13</b>
5.1.	Modules Description	13
<b>6.</b>	<b>Conclusions</b>	<b>15</b>
<b>7.</b>	<b>Screenshots</b>	<b>16</b>
<b>8.</b>	<b>Bibliography</b>	<b>23</b>
